

INDEX

<i>Paragraphs</i>	<i>Paragraphs</i>
A	
Aerial-lift, construction.....	4-66
maintenance.....	15-26
operations.....	4-67
type.....	15-25
Air terminals.....	9-9
Anchors, guy.....	4-50
submarine cable.....	5-20
Arcing gaps, bushing.....	3-33
Armor rods.....	4-33
Arrester, lightning—see "Surge arrester"	
Asbestos.....	15-5
B	
Backfilling pole.....	4-14, 4-31
Ballasts.....	6-4
Barehand live-line maintenance.....	4-64
Barriers.....	15-11
Batteries in storage.....	14-27
inspection of.....	14-28
Batteries in service, connections.....	14-26
lead-acid.....	14-24
nickel-cadmium.....	14-25
Battery chargers, accessories.....	14-22
maintenance.....	14-23
rectifier.....	14-21
requirements.....	14-20
Battery, charging considerations.....	14-10
equalizing charge.....	14-12
floating charge.....	14-11
precautions.....	14-9
Batteries, disposal.....	14-30
flooded, lead-acid, inspection visual.....	14-5
measurements.....	14-6
testing.....	14-8
inspection.....	14-18
maintenance, general.....	14-4
specifics.....	14-7
nickel-cadmium, description.....	14-16
requirements.....	14-17
replacement.....	14-29
safety.....	14-3
troubleshooting.....	14-19
types.....	14-2
valve-regulated, charging.....	14-4
differences.....	14-13
temperature compensation.....	14-15
usage.....	14-1
Belts, body.....	15-14
Bonding guidance.....	5-2
safety.....	5-21
Brace, push.....	4-50
Braces, crossarm.....	4-20
Bugs (split-bolt connector).....	4-42
Bus, cleaning.....	3-25
maintenance.....	3-24
substation, definition.....	3-23
testing.....	3-26
Bushing, arcing gaps.....	3-33
carbon deposits.....	3-33
compound migration.....	3-33
C	
Conductor lead.....	3-33
Definition.....	3-31
Gaskets.....	3-33
Ground sleeve.....	3-33
Insulation resistance test.....	3-35
Maintenance.....	3-33
Oil gage.....	3-33
level.....	3-33
Power factor test.....	3-34
schedule.....	3-34
Bushings, circuit breaker.....	8-14
porcelain.....	3-33
visual inspection of.....	3-33

TM 5-684/NAVFAC MO-200/AFJMAN 32-1082

<i>Paragraphs</i>	
Carbon deposits, bushings	3-33
Certification of personnel—see “Personnel certification”	
Ceramics, cleaning	3-22
inspection	3-21
repair	3-21
Chemicals, hazardous	15-8
tree killing	4-66
Circuit breaker, definition	8-12
maintenance frequency	8-13
safety measures	8-12
troubleshooting	8-17
Circuit interrupting devices	8-1
instruction manuals	8-2
insulating media	8-1
location	8-1
purpose	8-1
Circuit switchers	8-18
Clamp, hot line	4-42
Cleaning, buses	3-25
bushings	3-33
insulators, pole line	4-47
substation	3-22
Clearances, tree trimming	4-54
Climbers	15-15
Climbing space	4-2, 4-54
Codes, application	1-3
ground resistance	10-6
loading districts	C-5
overhead, aerial lifts	4-67
insulators	4-47
sags	4-35
tools	15-1
transformers	7-6
Combustible gases—see “Gases, combustible”	
Concrete, foundations	3-13, 4-31
poles	4-30
Conductor, aluminum	4-33
copper	4-33
copper-clad steel	4-33
covering	4-34
damage	4-36
loading districts	C-5
material	4-33
repairs	4-37
sags	4-35
ties	4-46
Connections, aluminum	1-16
conductor	1-16
dissimilar metals	1-16
soldered	4-33
Connectors, compression	4-42
tap	4-42
Constant current regulator—see “Regulator, constant current”	
Contacts, circuit breaker	8-14, 8-15, 8-16
control	11-11
relay	11-5
switch	8-11
Contamination of insulators	3-22
Control, equipment function	11-10
inspections	11-11
maintenance	11-11
photoelectric	6-8
repair parts	11-11
test equipment	11-11
troubleshooting	11-12
Corrosion, underground	5-32
galvanic	5-34
grounding	10-5
prevention	5-34
type of	5-33
Crossarms	4-19
Current transformer, definition	3-27
maintenance	3-29
safety precautions	3-29
short-circuited secondary	3-28
tests	3-30
Cutout, film disk (lighting)	6-14
plug type (lighting)	6-14
D	
Dead-end bells	4-46
Decay, pole	C-2, C-3, C-6
Dielectric tests, solid insulation	7-7
Digger, pole hole	15-2, 15-26
Duct, entrances	5-7
structures, maintenance and repair	5-10
system, maintenance and repair	5-9
E	
Electrode, ground	10-1
Emergency operating instructions	1-6
End bells	5-7
Equipment, conditions	2-1
inspection and test of	15-27, 15-28
Explosive gases—see “Gases, combustible”	
F	
Fault locating, cable	5-11
locating, equipment	5-16
methods	5-18
simplifying	5-15
visually	5-12
tests	5-14
tracing	5-17
types	5-13
Fixtures, maintenance	6-7
Frequency of inspections and tests	2-5
Fuses, medium-voltage power usage	8-5
maintenance	8-8
operation	8-6
replacement	8-7
G	
Galvanic corrosion, grounding	10-5
underground	5-34
Gases, combustible	5-4
toxic	5-4
Gloves, rubber	15-9
Ground, electrode	10-1
reduction of resistance	10-9
resistance of, measurement	10-8
testing	10-7
wire, overhead	9-9
Grounding	5-21
personal protective	1-12
protective equipment	15-13
Grounds, corrosion of	10-5
inspection of	10-4

	<i>Paragraphs</i>
testing of.....	10-8
Guy, anchor	4-50
markers.....	4-48
method of attachment.....	4-51
requirements.....	4-48
strain insulators.....	4-52
strands.....	4-49

H

Hand tools—see “Tools, hand”	
Hardware, pole line.....	4-28
Harmonic causes.....	16-10
interference	16-3, 16-13
measurements.....	16-12
power quality.....	16-11, 16-12
Hazards, minimizing.....	1-8
substances	15-4
Helmets.....	15-10
Hot line clamp.....	4-42
Hydraulic fluid, insulating.....	15-22

I

Identification, cable	5-2
pole and tower.....	4-2
Induced voltage surges.....	9-2
Infrared inspection.....	3-7
testing	3-7
Insect damage to poles	C-5
Inspection, rubber goods.....	15-9
substation buses	3-24
wood poles, instructions	4-13
pole-by-pole	4-15
records.....	4-12
spot.....	4-14
Instruments and meters, accuracy	12-11
adjustment.....	12-12
calibration.....	12-17
definition, instruments	12-1
meters	12-2
fixed.....	12-4
installation.....	12-9
inspection	12-6
maintenance.....	12-10
measurement validity	12-10
mounting.....	12-8
portable.....	12-5
repairs, field.....	12-13
shop	12-14
tests	12-7
troubleshooting, general	12-18
stray fields	12-16
temperature	12-15
Insulating liquids	7-8
Insulators, cleaning, pole line	4-47
substation.....	3-22
disc.....	6-14
general.....	4-45
guy strain.....	4-52
inspection	3-21
pin.....	4-46
post.....	4-46
repair.....	3-21
spool and knob	4-46
suspension	4-46

	<i>Paragraphs</i>
switch.....	8-11
test	3-20
ties	4-46
Insulation, high potential test	7-7
polarization index.....	7-7
power factor test, bushings	3-34
cable.....	5-29
transformers	7-7
resistance	7-7
Interference, checking	16-8
electromagnetic	16-2
harmonic	16-3
communications	16-9
location of	16-7
radio, conductor ties	4-46
distribution system	16-4
origins	16-5
power quality	16-1
weather conditions	16-6

J

Joint use of poles	4-2
--------------------------	-----

L

Ladders	15-16
Lamps	6-5
Lashing, cable	4-39
Leak test, capacitor	13-13
pressure, cable.....	5-12
Leather goods	15-14
Light distribution patterns	6-10
Lighting, multiple circuit	6-2
multiple circuit components	6-3
outdoor	6-1
series circuit	6-2
Lightning arrester—see “Surge arrester”	
Lightning ground wire, overhead	9-9
masts	9-9
rods	9-9
Liquids insulating	7-8
Live-line maintenance, categories	4-63
methods	4-64
operation	4-65
Loading districts, conductor	C-5
Locator, radio interference	16-8
Luminaires	6-4
components	6-6
lamps	6-5
maintenance	6-7

M

Maintenance proof-testing, frequency	17-3, 17-4
planning	17-1
priorities	17-2
reasons	2-2
responsibility	1-5
scheduling	1-7
standards	1-4
Manholes	5-6, 5-9
Masts, lightning	9-9
Messenger, cable	4-24
Metal poles	4-26
painting	4-29

TM 5-684/NAVFAC MO-200/AFJMAN 32-1082

<i>Paragraphs</i>	<i>Paragraphs</i>		
towers	4-27	Polychlorinated biphenyls	15-6
use	4-25	Porcelain—see “Ceramics”	
Meter, battery charger	14-11	Potential transformer—see “Voltage transformer”	
Meters—also see “Instruments and meters”		Potential troubles	1-15
Moisture test	5-30	Potheads, cable	5-25
Multiple circuit characteristics	6-2	Power factor test, insulation	7-7
N		Power quality data	16-2
Nonceramics, cleaning	3-23	electrical	16-1
inspection	3-21	responsibilities	16-11
repair	3-21	Priorities	17-2
Numbering, pole and tower	4-2	Protective gaps	9-11
O		Push brace	4-50
Operating conditions	1-14	R	
OSHA, aerial lift	15-18	Radio interference	4-46
live-line tools	4-67	Railroads, spans crossing	4-41
references	1-2	Recloser, automatic, definition	8-19
Outdoor lighting, circuits	6-2	maintenance	8-19
airfield lighting	6-12	Records, cable	5-31
floodlighting	6-11	live-line tools	15-18
roadway lighting	6-10	maintenance, general	1-6
standards	6-9	performance	2-3
use	6-1	protective and switching device	8-4
Overhead distribution, components	4-8	substations	3-3
construction	4-1	transformers	7-4
guidance	4-2	wood poles	4-12
line maintenance	4-9	Regulations—see “Codes”	
open wire	4-32	Regulator, constant current, description	6-15
Obstructions	4-2	loading	6-15
Oil, circuit breakers	8-14	operating	6-15
tests, transformer	7-8	testing	6-16
P		Regulator voltage	7-2
Painting, metal poles	4-29	Relay contacts	11-5
galvanized steel	3-9	construction	11-3
painted steel	3-10	function	11-1
structures, aluminum	3-11	fundamentals	11-2
Painting of metals	4-25	inspection	11-5
PCB—see “Polychlorinated biphenyls”		maintenance periods	11-4
Personnel requiring certification and qualification, general. 1-9, 1-10		operational checks	11-5
live-line work	4-22	repairs	11-9
wood treatment work	4-62	test equipment, laboratory	11-8
Personnel for tests, general	2-4	field	11-8
power factor	3-34	tests	11-6, 11-7
Pesticides	4-14	Repair, conductor	4-37
Pins, insulator	4-46	submarine cable	5-20
Platforms	4-21	underground cable	5-1, 5-19
Poisonous plants	4-61	also see specific item	
Pole, adequacy	4-16	Resistance, ground electrode	10-1
damage	C-5	Resistance of grounds, measurement	10-8
identification	4-1	tests	10-8
inspection of wood	4-14	how to reduce	10-9
joint use of	4-2	Resistor, bypass	9-12
line hardware	4-28	Responsibilities, maintenance	1-5
line maintenance	4-8, 4-9	Rights of way, aerial	4-2
metal	4-26	underground	5-2
reinforcing	4-18	Rod gaps	9-11
replacement	4-17	lightning	9-9
storage	C-5	Rope, care of	15-23
treatment, initial	C-3	splicing	15-24
in place above ground line	4-23	Rot, pole	C-5
at or below ground line	4-24	Rubber goods	15-9
		testing	15-9

<i>Paragraphs</i>	
S	
Safety, aerial-lift operations.....	4-66
battery.....	14-3
cable repair	5-3, 5-22
capacitor	13-5
circuit breaker inspection.....	8-12
combustible gases—see "Gases, combustible"	
constant current regulator.....	6-15
current transformer connections	3-28
disconnecting switch	8-10
explosive gases—see "Gases, combustible"	
fault locating	5-14
freedom from obstructions	4-2
grounding, maintenance.....	10-3
measurements.....	10-7
protective	15-3
provisions	10-2
handtools	15-20, 15-21, 15-22
instrument transformer	3-29
live-line maintenance, categories	4-64
general.....	1-13
